

TEN THOUSAND
VILLAGES

On The Edge Geo Lantern

When the wind starts blowing, the candle will remain lit in this geometric lantern with angled sides and a functional handle. Handcrafted by makers with Tara Projects in India, which works to change the lives of the country's "untouchables" by eliminating unfair trade practices and child labour.

Materials:
glass, metal

About the Artisans

Tara Projects

Tara Projects works to change the lives of India's "untouchables," by eliminating unfair trade practices and child labour, fighting the exploitation of artisans and supporting Fair Trade and human dignity. Tara is a pioneering Indian organization in the field of fair wages, non-formal education programs for children and women, health and environmental awareness, adult literacy centres and further development for its member artisans. Numerous levels of committees with elected representatives from all sections of the project co-ordinate the production, design and marketing of handicrafts. Currently, nearly 1000 artisan families from 35 community-based artisan groups and workshops create products from all the major traditional handicraft lines of northern India. These artisans receive medical insurance, interest-free loans and advances, access to savings programs and skills training.

Travel the world with each visit to Ten Thousand Villages.

Learn how Fair Trade really makes a difference. Our goal is to provide vital, fair income to artisans by marketing their handicrafts and telling their stories in North America. Ten Thousand Villages sells product from more than 30 countries, providing work for nearly 60,000 people around the world.
